

# Deloitte.

Change the world,  
not who you are.

What impact will you make?

## Actuarial and Insurance solutions – Life Practice (AMC) opportunity in Johannesburg

- We have a number of roles in the AMC from Graduate to Manager Level.

Deloitte is the largest private professional services network in the world. Every day, approximately 220,000 professionals in more than 150 countries demonstrate their commitment to a single vision: to be the standard of excellence, while working towards one purpose – to make an impact that matters.

### About the Division

Join the AIS Actuarial Modelling Centre (AMC) in Deloitte's leading actuarial life practice and apply your skills in modelling projects reaching beyond traditional actuarial boundaries. You will work with colleagues and clients globally, exposing you to cutting edge actuarial work. Here you will develop an impressive range of actuarial modelling skills that will multiply your career opportunities.

Our practice has both breadth and technical depth, which is increasingly important in an ever-changing regulatory landscape. You can expect to be involved in a number of key services, ranging from stochastic and deterministic asset and liability modelling covering Solvency II, IFRS17, model rationalisation and finance transformations using various industry modelling tools and applications. All of this is underpinned by our cutting edge Actuarial Modelling Centre where we work with a variety of software including FIS Prophet and Towers Watson MoSes/Risk Agility to further develop and enhance our way of working.

### We are looking for the best people to do the most challenging work

To qualify for the role you must have:

- Knowledge of the life industry commensurate with the role being applied for;
- The ability to apply your knowledge in practical and commercial situations;
- A solid academic track record, ideally a degree in actuarial science with progress in actuarial exams;
- Experience of building modelling systems, for example FIS Prophet, Towers Watson MoSes/Risk Agility, or spreadsheet-based models, or a strong technical computer programming background;
- Strong communication skills.

We will also consider actuarial candidates from other backgrounds (e.g. pensions) and those who have gained some of the above skills through a non-traditional actuarial background such as actuarial technicians, statisticians, business analysts and project managers.

### Your Development

We take your development very seriously. Our performance management process is structured, transparent and interactive. You will receive continuous training and bi-weekly supportive feedback to help you develop in your current role and progress through the grades as quickly as you can.

We foster an open and friendly working environment that naturally allows everyone to learn from the wide range of experts within the practice and globally. You will have access to the experience and skills of some of the world's leading actuarial modellers who are invested in your success.

We also believe in structured development through formal training and personal development plans, covering areas such as:

- Actuarial modelling skills;
- Building relationships;
- Project Management;
- Business development; and
- Consulting skills.

### As part of the AMC practice, you will

- Actively contribute to a wide range of actuarial modelling projects;
- Managers and Senior Consultants will manage small teams of junior actuarial trainees as part of a larger project, including performance management and improve their modelling skills through on-the-job coaching;
- Have extensive client contact, including dealing with queries and attending meetings remotely with support;
- Contribute to practice management, for example mentoring less experienced colleagues and involvement in developing the Actuarial Modelling Centre.
- Build models in a wide range of computer languages
- Have a strong programming background

If you meet the requirements for this opportunity, please send a detailed CV to Kim Williams at [kimwilliams@deloitte.co.za](mailto:kimwilliams@deloitte.co.za)

All enquiries will be treated in the strictest confidence. Reference for applications: AIS AMC  
Preference will be given to candidates from designated groups in line with Deloitte's policy.
