

EXCITING OPPORTUNITY:

Innovative Actuary Wanted *for Healthcare & Life Insurance Revolution*

Health Window, a forward-thinking medication adherence company, is looking for an ambitious and highly innovative Actuary to join our dynamic team. If you thrive on turning unique datasets into actionable insights and want to be part of a game-changing venture that will disrupt the status quo, this is for you.

Position Overview:

As a key player in our growth story, you'll be at the forefront of:

- Advancing our understanding of how our services could impact underwriting, distribution, risk identification, risk management, pricing, etc.
- Working within a very progressive team to build value to the Life Insurance sector, and
- Working with our data scientists to define and validate new metrics of risk. Broad but solid experience is quite essential.

Responsibilities:

- Data analysis and modelling, utilizing your expertise to uncover valuable insights on product positioning.
- Collaborate with cross-functional teams to shape our software platform's functionality.
- Evaluate and quantify risks related to medication adherence, healthcare interventions, and life insurance products.
- Provide invaluable actuarial support, guiding strategic decisions and fueling business expansion initiatives.
- Translate complex actuarial concepts into clear and compelling messages for non-technical stakeholders.
- Work hand-in-hand with data scientists, software developers, and business analysts to push the boundaries of innovation and optimize solutions.

Requirements:

Actuarial Science Degree

5+ years of actuarial experience, specifically in life insurance and preferably in health also.

Pricing and underwriting experience strongly beneficial.

Proficiency in statistical software and actuarial modelling tools

Stellar communication and collaboration skills

Forward-thinking
