

## **Actuarial Analyst: Corporate Actuarial (IFRS 17)**

### Roles and responsibilities

The Nedbank Insurance Corporate Actuarial team provides the business with a range of services, offering new teammembers the opportunity to gain experience across a broad range of functions. The key focus of these roles within the team is on enabling Nedbank Insurance to amend and enhance its reporting and valuation processes to meet the IFRS17 reporting standard requirements

### **Responsibilities include:**

- Developing an understanding of our current valuation and reporting processes.
- Prototyping solutions to meet the IFRS17 requirements.
- Implementing the relevant solutions in our current valuations and reporting processes.

In carrying out these responsibilities, team members interact with the Nedbank Insurance Finance (actuarial and accounting) team, as well as members of the broader Nedbank Group involved in Nedbank Insurance IFRS17 implementation.

### **Requirements**

We have positions available for actuarial professionals with a passion for learning and solving problems. We require people with a range of experience, from actuarial professionals with a few years' experience to newly qualified actuaries.

### **Successful candidates:**

- 3 to 7 exams would be good minimum range, with 1 to 3 years' experience in corporate actuarial environment.
- must be able to work independently and as part of a team; and
- should preferably have experience in either the short-term or the long-term insurance industry, specifically in SAM, SVM, IFRS or EV reporting.
- Prophet, DCS, ResQ or R experience will be an advantage.
