

PERMANENT POSITION, CAPE TOWN

SENIOR ACTUARIAL SUPERVISOR ACTUARIAL MODEL DEVELOPMENT

Old Mutual is a premium African financial services organisation that offers a broad spectrum of financial solutions to retail and corporate customers across key market segments.

We are rooted in our purpose of **Championing Mutually Positive Futures Every Day** and believe that a great customer experience is anchored in a great employee experience.

JOB SPECIFICATIONS

Old Mutual's Actuarial Model Development Team is a Centre of Excellence situated in Cape Town. The team is responsible for the design, development and maintenance of Actuarial Models, Data Repositories and Process Automation for the Financial Reporting & Pricing functions in Old Mutual's life assurance businesses across Africa. In addition to focusing on the models, the team is responsible for IT solutions & governances supporting the actuarial models and processes. Meeting IFRS17 actuarial requirements is a significant challenge for the team in the foreseeable future, requiring suitably skilled actuaries to deliver.

We are currently looking to fill a senior role in the team.

DUTIES AND RESPONSIBILITIES

An immediate challenge for the team will be developing and implementing efficient modelling & IT solutions and process automation for the new IFRS17 accounting standard. Expected deliveries include:

- Finding and implementing solutions for modelling and reporting challenges (primarily for IFRS17)
- Designing, implementing and maintaining appropriate IT solutions in support of the actuarial reporting function
- Designing and maintaining databases for the management of all actuarial reporting data
- Working on projects spanning several business units
- Identifying opportunities for standardisation and improved efficiency through automation or process changes
- Implementing and maintaining data and model governances

QUALIFICATIONS AND EXPERIENCE

To be considered for this role, you must be:

- A Qualified actuary or an actuarial student with minimum of 14 actuarial credits and 6 years relevant experience. Knowledge of IFRS17 would be a particular advantage
- Creative problem solving skills with the ability to design appropriate models and IT/process solutions to address business requirements
- Able to demonstrate database skills
- Passionate about models, programming, IT and data

PERSONAL ATTRIBUTES

To be considered for this role, you must:

- Enjoy being a problem solver
- Enjoy developing and coding
- Take Initiative - this is essential
- Be able to train and supervise others in modelling and processes
- Be able to work independently, as well as in a team
- Be deadline driven and highly motivated

COMPETENCIES

- Strategy
- Collaboration
- Leading with Influence
- Innovation
- Personal Mastery
- Execution
- Customer First
