

WE'RE HIRING

ACTUARIAL CONSULTANT TO ACTUARIAL MANAGER (GENERAL INSURANCE) JOHANNESBURG OFFICE

The General Insurance consulting team is expanding, and we are offering roles at various levels of development and seniority. The team assists clients in 22 countries across Africa on a range of projects varying between statutory appointments to complex pricing models and capital calculations. The same division is responsible for Enterprise Risk and Capital Management and Data Science.

RESPONSIBILITIES:

- Calculating technical provisions including IBNR, UPR, AURR etc. based on IFRS 4 and IFRS 17.
- Capital modelling including determining the SAM SCR, as well as capital requirements in other jurisdictions.
- Product pricing and design, including working with GLMs.
- Supporting IFRS 17 implementation projects
- Reinsurance reviews and optimisation, Asset liability modelling and other work to provide technical advice to clients across Africa.
- Producing reports, reviews and analyses and on all areas of short-term actuarial services.

REQUIREMENTS:

- 3 – 8 years' experience in General Insurance, either in pricing, capital modelling or valuations.
- Experience with SAM, ORSA's, valuations and solvency calculations will be beneficial.
- Experience with IFRS 17 will be beneficial.
- Strong work ethic and highly motivated.
- Good progress with exams or qualified.
- Strong actuarial technical skills.
- Good communication skills.

WHAT TO EXPECT:

- Be part of the largest independent actuarial consultancy.
- Work on a 140+ clients across 22 countries.
- Be part of the team that completed over 600 projects in 2021.
- Enjoy flexible work hours and location as part of our hybrid work policy.
- We encourage inclusivity and diversity.
- We develop and train our future leaders.
- Gain exposure across various actuarial areas.
- We are agile and encourage entrepreneurial thinking.
