

Job type: Permanent

Industry: Life Reinsurance

Location: Hong Kong

Salary: Very competitive salary

Closing date: 12 October 2021

Chief Pricing Actuary

Fantastic opportunity to work with a leading global reinsurer in Hong Kong. Our client is looking for a Chief Pricing Actuary to be part of the leadership team of the Asian markets.

About the role:

- Provide long-term growth strategy and short-term tactics for the regional markets.
- Provide global leadership into the technical direction and lead functional aspects of pricing strategy, methodology and guidance for regional operations.
- Manage a team of regional actuarial professionals to provide technical support to local offices across the region and/or globally as needed.
- Maintain technical excellence with up-to-date industry experience, outstanding client focus and implementation of best practices across the region.

About you:

- 10 years of experience in senior leadership roles with proven successful track record. 15+ years of actuarial experience in Life & Health and 5+ years in reinsurance. A strong combination of technical depth and leadership experience is required.
- Fellowship from a globally recognised actuarial institute. (e.g. US, UK, Australia or equivalent).
- Expert knowledge of pan-Asian insurance markets, reinsurance practices and actuarial modelling.
- Exceptional communication, negotiation, and client interaction skills with a strong understanding of different Asian cultures.

Job type: Permanent

Industry: General Reinsurance

Location: South East Asia

Salary: competitive salary

Closing date: 12 October 2021

GI Senior Actuary

Great opportunity to work with a global reinsurance broking house to be based in the regional hub in South East Asia.

This position will be responsible for leading and managing the day-to-day activities of the Analytics team in this office plus, importantly, ensuring that the team works and coordinates seamlessly with the teams in the broader Asia Pacific region.

About the role:

- Deliver and expand analytical support to existing portfolio and new business opportunities, including technical pricing, modelling and general avenue for analytical opinion.
- Work closely with the broking team to embed actuarial capabilities into client teams across existing portfolio and new business opportunities.
- Support development and closure of product innovation as well as individual deals including identification of suitable opportunities and negotiations with markets.
- Lead and manage Analytics team and provide technical support to sub-regions within APAC.

About you:

- Fellowship from recognised actuarial institute preferred.
- 10-15 years of experience with reinsurance analytics or equivalent background preferred, including direct pricing and specialty class experience a plus.
- Proven track record of successful team leadership experience.
- Strong communication and client interaction skills.
