

ASSA Exam Fact of the Day:

Know When You Need to Be Ready to Write

Being ready for your examination means more than preparing for the syllabus. It is important that you understand the arrival, seating, login and start-time requirements that apply on examination day.

Whether you are writing at an ASSA examination venue or remotely, make sure you know when you are required to be ready to write. Arriving or logging in late may result in forfeiture of your examination attempt.

Writing at a venue?

Candidates writing at a venue must be seated in the examination venue 30 minutes before the scheduled examination start time. Venue doors will close at this point.

Candidates arriving after the seating cut-off time will not be permitted entry and will forfeit their examination attempt.

For example, if your examination starts at 09:00, you must be seated by 08:30.

Once seated, you will not be permitted to leave the venue until 30 minutes after the start of the examination. We therefore strongly recommend that you make use of restroom facilities before presenting yourself for registration.

Candidates are also not permitted to leave the examination venue during the final 30 minutes of the examination.

The 30-minute period before the examination allows invigilators to complete essential checks, provide instructions and ensure that systems are functioning correctly before the examination begins.

Writing remotely?

Candidates writing remotely must be **logged into the examination system at their scheduled examination start time.**

The previous one-hour grace period for late logins has been removed. If you are not logged in at the scheduled start time, you will forfeit your examination attempt.

Remember

Before examination day, check your scheduled examination start time and make sure you understand the requirements that apply to your examination mode.

Venue candidates: Be seated 30 minutes before the scheduled start time.

Remote candidates: Be logged into the examination system at the scheduled start time.
